Hongkond, MARCH 16TH, 1892.

Ir is without surprise but not without great regret that we note the commencement of an agitation in British Columbia for the exclusion of the Chinese. It is not astonishing that some touch of the prejudice felt against assault-at-arms, and the programme includes Chinese on the other side of the Canadian international tugs of war, single stick bayonet directly Caucasian labour came to feel the and boxing. In connection with the last item competition of the coolie. Some time ago a trophy will be given for a six round contest the eastern provinces, and now we find the distinguishing themselves. As will be seen Huang was arrested for gambling, a trifling cember, 1891, the figures for silver coins were: women, and girls who have been inveigled into inhabitants of Vancouver, a city only brought from the advertisement in another column, eninto existence by the completion of the Canadian Pacific Railway-a work so largely due.

front of the offending by the Chinese is us a working Caucasian, population is now unfortunately for him was observed. springing up in British Columbia, the shoo is beginning to pinch. This agitation against the Chinese is to be deplored, not in Chinese dians themselves. The immigration does not benefit the Chinese alone; it enriches the a supply of cheap labour with the aid of which Canadian factories could soon compete successfully with those of California. It would gradually produce a large trade between Canada and China, of which the would ultimately make of Vancouver the

American continent. It would likewise bring about the rapid opening up of the great corn lands of the western provinces of the Dominion, and no doubt basten the exploitation of its valuable mineral resources: Many of the evils attending the immigration Central Station; a large sum of money was of Chinese could be remedied by sensible legislation. Why should they be allowed floor, jumped from the window and sustained into live under insanitary conditions not juries which necessitated his removal to the tolerated among the Caucasian section of the population? The tyramy of the highbinders might readily be corbed, just us the teeth have been drawn of the secret societies in the Straits Settlements, and the system of female slavery could be gradually and surely put down. As for the at 6 o'clock next morning; and that all the Indoopium babit, that is certainly an unpleasing China Company's steamers were in the Peiho. vice, but it is harmless when compared with the evils which attend intemperate indulgence in alcohol. There portion of terminals among Chinese immigrants, but, it is not greater than among arrivals from European countries, small bodies also now exist in Osaka and Kyoto. The Vancouver agitators desire to check Oriental immigration by a poll tax of \$500 having a more rapid success among the Japanese and a tax of \$50 per head on those now resident in the Dominion, which would of course suffice to exclude the coolie class, but we hope that they will not succeed in their crusade, convinced as we are that they have little idea of how seriously the growth of their promising city would be impaired by the passage of such an Act by the Parliament at Ottawa. If the Dominion Government too readily liveds the outery now raised by a section of the population and legislates in haste, the citizens of Vancouver are likely to find reason to repent at leisure

A terrible accident, resulting fatally, has just occurred in connection with the new building of the Hongkong Hotel. So far the work, which, considering the height of the edifico, naturally involves a good deal of danger, has proceeded without say mishaps. The other avening, however, a bricklayer was working on the fourth storey in the dusk alone, when he missed his footing and fell down the shaft, which is to be the lift when completed, to the ground beneath. His sufferings must-have been very great during the night for he was not discovered until the next day, when he was removed to the Tung Wa Hospital. He died, however, about twelve hours afterwards. It seems only reasonable to suggest that some precaution should be taken in the future, such as the fixing of netting scross the lift at each floor, and doubtless something of this kind will be done.

The San Francisco Call of the 16th ult. thus refers to the latest Chinese Exclusion Bill :-The House Committee on Foreign Affairs has reported favourably Geory's bill prohibiting the coming of Chinese into the United States. This is the most stringent anti-Chinese Bill that has yet been considered in Congress. It excludes all Chinese, without regard to rank or occupation, except Government officials, It based upon the principle that a race who do not assimilate with the natives are not desirable residents. Chinese merchants, no more than labourers, come here to stay. They come to make a little money and return when they have ac quired a competence. The two Houses of Congress are now face to face with an infective Bill to keep Chinese out of the country.

A singular case of attempt d robbery in Queen's Road came before Mr. Wiss yesterday at the Police Court. A coolin and a bricklayer both described on the sheet as vagabonds, were charged with being armed, attempting to commit a felony, and with resisting the police. It appeared from the evidence that a Chinese constable was on duty in Queen's Road on Monday night about half-past eleven, when he saw one of the defendants ssize a man while his accomplice endeavoured to possess bimself of his purse. Of their generation, and by supplying a felt want course the officer interfered, whereupon the second for thousands of Chinese in this colony, at once defendant struck him violently with a broom on the head and urged the other rufflan to stab him with hi-dagger. Timely assistance arrived and the men were arrested. Mr. Wise sent the the one at Canton claim; pre-eminance as being bricklayer to gool for six weeks and inflicted a the largest in the world. > We received a letter yesterday signed " Wellisher" commenting on rumours said to have been current about town "to the effect that owing to the continual depreciation which has been taking place in stocks for about a year past the Bank Authorities have some to the conclusion that it would be prejudicial to their "interests to make any more advances on shares, as they are said to entertain the belief that by "the adopt in of this plan they will effect a "limit to their possible loss through depreciation in the prices of stocks which they hold as 'scourities." In the present state of the market the adoption of this course would be a calamity to the Colony, and even the rumour of such a thing would be calculated to cause a further collapse in prices. Application was therefore made to the Bink for confirmation or denial of the report, and the enswer received was that it was 'quite untrue." THE CANTON MINT.

At this moment when complaints are loadly and indignantly expressed in this Colony at the gradual supersession by the Chinese onins over those bearing the Queen's head, a few facts and figures relative to the working, and production of the Canton Mint may neither be amiss nor uninteresting. It is unnecessary to dosmore than refer to the evil of a double set of coins circulating in Hongkong. That the circulation | day :of Chinese coins in a British colony is a grievous mistake politically and the cause of much annoyence and bother commercially is a fact too obvious to require elaboration; but so long as British authorities are content to pursue a policy of kieses fairs, to the detriment of their prestige and the depletion of their revenue, Kwangtang officials are not to be blamed for being wise in

There are 18 outling out presses, 86 cash coining presses (at present there are only 19 in use), and 4 other larger presses in the Silver Mint. Previous to the coining the blanks, are subjected to an annealing and oleaning process by means of diluted solphuric soid and by being put into revolving barrols with warm husks of rice. With the sorting and counting the oash are ready to be despitched to the Treasury. The muchines are capable of producing 2,000,000 cash per day. but it present the production is only 500,000 The manufacture of cash brings in no revone to the Government: on the contrary it is the cause of a serious loss. When the Mint first commenced operations the Government lost 5 per cent ; they now lose 20 per cent. which is still cheaper than in the days whom it took 13 cash to make a cash. For every 100,000 cash, more or less two dies are necessary. Rather less than half of scrap from cutting on and coining averages about 50 per cent. of coins; the other half has to be melted over again. The manufacture of the silver coins is a similar process to that of the cash; with the exception of course of the pieroing and the addition of the compressing of the edges. Silver Mint can turn out 100,000 pieces per day, but at present the production is 50,000. Registrar-General's Office. Hongkong, 1st February, 1893 Sir. -I have the honour to forward herewith for submission to His Excellency the Governor the translation of a patition from the Chinese Society for the Protection of Women and hildren commonly known as the Po Laung Kuk, praying that the Government will pleased to devise some means of making a grant to the Society, which will enable it to meet its expenditure, and to place the Institution on firm and lasting busis.

3.—In the year 1878, public attention wa drawn to the question of traffic in human beings and the ovil practice of kidnapping by the lat Sir John Smale, who was at that time filling the office of Chief Justice. The discussion, to which his utterances from the bench gave rise, created much interest among the Chinese community which led to a numerously signed memorial being presented by-the Chinese residents to the Governor, Sir J. Pope Heunessy, praying for permission to form an association to: suppressing kidnapping and kindred offen-This memorial was forwarded to the recretary of State for the Colonies, and in reply the Earl of Kimberley slated that the memorialists should be allowed to form an association of whatever kind they desired, and that, in order to obtain official recognition, its rules and organisation should be made known and approved by the Colonial Government Before the receipt of these just ructions a society entitled the Po Leung Kuk had already been constituted informally and was reported to have rend red much practical assistance to the Go. vernment The Acting Chief Justice, Mic Snowden, stated that he found the society of great bely in the detection of kidnappers and the Governor expressed his conviction that its operations and influence would do more than anything else to put an end to whatever was runlly had in the native customs, to which Sir John Smale had drawn so much attention. Rules the society were drawn up and it. was proposed that an Ordinance giving them legislutive force should be introduced. Sporetary of State did not consider legislation necessary and suggested that if the society required corporate powers, the Association could be formed under the Companies Ordinance and formal approval could be given to its rules and organisation by the Local Government. In cornation of the Society at that time was found impracticable and it was agreed that publication of the rules as amouded would meet all practical purposes. The following notice and rules were accordingly published in the Government Gazette f the 5th August, 1892.

In 1887, another site, a vacant piece of ground immediately behind the Tung Wa Hospital, which is now built over, was applied for, but it was finally decided that the Government should build a row of houses the top floors of which could be used as a Home and the other floors let out as shops or residences. NOW ON SALE. IMPERIAL QUARTO. MANGLISH AND CHINESE DICTIONARY. WITH THE PUSTI AND MANDADEV

PRONUNCIATION. An Auglo-Chinese Dictionary, published at the Daily Press Office, Hongkong. For comprehensiveness and practical servicethis Work stants unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objests in machinery, photography, telegraphy. and inscience generally, which the rapid advance of foreign relationshas imposed upon them, are

here given in extense. Each and every word is 1659 fully illustrated and explained, forming exercises for students of a most instructive asture. Both the Court and Punti pronunciations are given the accents being parefully marked on the best principle hitherto attained. The typography order :displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore charge

terized Chinese publications. To illustrate the rast scope of the work the following facts are submitted for consideration:-Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100.000, while this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters, Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many se any other Dictionary, hitherte pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages mables a person who understands English to communicate effectively with natives who OMFORTABLE BOARD and RESI understand nothing but Chinese, In this respect DENCE, I. Queen's Road-East. Terms the work will be found indispensable to all Europeans residing in Chins, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties resident in England and interested in China it cannot but be invaluable occasion-
